

Zoho – String-Based Problem Bank (Level 2)

(Sorted by frequency of appearance in Zoho's past tests)

1. Reverse Words in a Sentence (*Very Frequent*)

Problem:

Given a sentence, reverse the order of words without reversing the characters in each word.

Sample Input:

I love Zoho

Sample Output:

Zoho love I

2. Check if Two Strings are Anagrams (*Very Frequent*)

Problem:

Given two strings, check if they are anagrams (contain the same characters with the same frequency).

Sample Input:

listen
silent

Sample Output:

Yes

3. Remove Duplicate Characters in a String (*Frequent*)

Problem:

Remove all duplicate characters from a string while keeping the first occurrence.

Sample Input:

programming

Sample Output:

progamin

4. Longest Palindromic Substring (*Frequent*)

Problem:

Find the longest substring in a string that is a palindrome.

Sample Input:

babad

Sample Output:

bab

(Note: "aba" is also valid)

5. String Compression (Run Length Encoding) *(Frequent)*

Problem:

Compress a string using the counts of repeated characters.

Sample Input:

aaabbc

Sample Output:

a3b2c1

6. First Non-Repeating Character *(Frequent)*

Problem:

Find the first non-repeating character in a string.

Sample Input:

swiss

Sample Output:

w

7. Pangram Checker *(Frequent)*

Problem:

Check if a sentence contains every letter of the alphabet at least once.

Sample Input:

The quick brown fox jumps over the lazy dog

Sample Output:

Yes

8. Balanced Parentheses (*Frequent*)**Problem:**

Check if the given string of brackets is balanced.

Sample Input:

{[()]}

Sample Output:

Balanced

9. Count Vowels and Consonants (*Frequent*)**Problem:**

Count the number of vowels and consonants in a given string.

Sample Input:

hello

Sample Output:

Vowels: 2

Consonants: 3

10. Palindrome Check (*Frequent*)

Problem:

Check if a given string is a palindrome.

Sample Input:

madam

Sample Output:

Yes

11. Find All Permutations of a String (*Occasional*)

Problem:

Print all permutations of a given string.

Sample Input:

abc

Sample Output:

abc

acb

bac

bca

cab

cba

12. Substring Search (Without Inbuilt Functions) (*Occasional*)

Problem:

Find the index of the first occurrence of a substring in a given string without using built-in search functions.

Sample Input:

haystack: hello world

needle: world

Sample Output:

6

13. Toggle Case of Characters (Occasional)**Problem:**

Convert lowercase letters to uppercase and vice versa.

Sample Input:

Hello World

Sample Output:

hELLO wORLD

14. Count Occurrences of a Word in a Sentence (Occasional)**Problem:**

Count how many times a word appears in a sentence.

Sample Input:

Sentence: this is a test this is

Word: is

Sample Output:

2

15. Remove All Vowels from a String (Occasional)

Problem:

Remove all vowels from the given string.

Sample Input:

beautiful

Sample Output:

btfl

16. Remove Consecutive Duplicates

Problem:

Given a string, remove consecutive duplicate characters.

Input:

aaabbcddd

Output:

abcd

17. Longest Common Prefix

Problem:

Find the longest common prefix among given words.

Input:

flower flow flight

Output:

fl

18. Subsequence Check**Problem:**

Check whether a string is a subsequence of another.

Input:

abc
ahbgdc

Output:

Yes

19. Minimum Window Substring

Problem:

Given two strings **s** and **t**, find the minimum window in **s** which contains all characters of **t**.

Input:

s = "ADOBECODEBANC", **t** = "ABC"

Output:

BANC

20. Remove All Adjacent Duplicates**Problem:**

Remove duplicates if they appear adjacent multiple times.

Input:

abbaca

Output:

ca

21. Check Rotation**Problem:**

Check if one string is rotation of another.

Input:

```
s1 = "waterbottle"  
s2 = "erbottlewat"
```

Output:

Yes

22. Convert Roman to Integer

Problem:

Convert Roman numeral string to integer.

Input:

MCMXCIV

Output:

1994
